Grade 9 at Hammarskjold High School | 2026-2027

Students along with parents/guardians determine compulsory course type during Grade 9 Registration in February.
French Immersion students will have some compulsory courses preselected for them.

Mathematics - Pre AP	MTH1WA	Science - Locally Developed	SNC1L1
Mathematics - De-streamed	MTH1W1	French - Academic	FSF1D1
Mathematics - Locally Developed	MAT1L1	Français - FI - Academic	FIF1D1
English - De-streamed	ENL1W1	Geography - De-streamed	CGC1W1
English - Locally Developed	ENG1L1	Géographie - FI - De-streamed	CGC1WF
Science - De-streamed	SNC1W1	FNMI Languages - Open	LNOA01

Students along with parents/guardians will select three (3) electives. A fourth choice will be indicated on the Grade 9 verification form as a record for us in the event that a student's timetable does not allow for the first three choices.

Building the Entrepreneurial Mindset- Open	BEM101
Drama - Open	ADA101
Expressions of First Nations, Métis and Inuit Culture - Open	NAC101
Éducation Physique - FI - Open	PPL10F
Health and Physical Education - Open	PPL101
Healthy Active Living (EDGE Hockey Academy)	PAL10H/PAI10H
Music - Open	AMI101
Music - Guitar - Open	AMG101
Music - Strings - Open	AMS101
Technology and the Skilled Trades - Open	TAS101
Visual Arts - Open	AVI101

HAMMARSKJOLD HIGH SCHOOL

A TRADITION OF EXCELLENCE

Hammarskjold offers a full range of secondary programs to address the needs of all career pathways and post secondary destinations. Whether your destination is university, college, apprenticeship or work, you will find a selection of courses to meet your needs. Hammarskjold offers a comprehensive and diverse Fine Arts program. Hammarskjold is also fully equipped with new technology including WiFi throughout the school.

Hammarskjold's Advanced Placement courses are available in English, mathematics and French Immersion and may qualify for university recognition. Our broad-based technology department offers college and workplace courses in four different areas. As Lakehead Public Schools' French Immersion high school, students are able to earn their certification in French Immersion by completing 10 credits from a number of courses available in French.

A broad spectrum of support programs is offered to our students. Our Breakfast Club, offered daily, is supported by the Red Cross and Breakfast Canada. Recognizing that personal health is vital to student success, we have a partnership with the Thunder Bay District Health Unit to serve the health needs of our students. Hammarskjold is indeed an inclusive high school with a wide range of programs including the Pre-Workplace Program (PWP) and a Special Needs Class designed for students with developmental disabilities.

Hammarskjold has active student leadership. Students engage in many activities including leadership development for Grade 9 and Grade 10 students held at the Kingfisher Lake Outdoor Education Centre. Furthermore, Student Council members actively support community activities and a wide range of co-curricular opportunities, particularly in the area of clubs and athletics. Other groups include, but are not limited to, Yearbook, Dance, Chess, Drama, Hammbassadors, Gender & Sexuality Alliance (GSA) and STEM.

Hammarskjold students participate in a variety of sports at all levels: cross-country running, football, wrestling, track and field, cheer leading, golf, volleyball, basketball, biking, soccer, badminton, tennis, curling and more. Hammarskjold is proud to compete in all SSSAA athletic activities.

SPECIALIST HIGH SKILLS MAJORS

Senior students at Hammarskjold have the option of selecting a Specialist High Skills Major focus in two areas:

- Construction
- Justice, Community Safety and Emergency Services

Students who achieve a "bundle" of Grade 11 and 12 credits for a university, college, apprenticeship, or workplace pathway leave our school with sector recognized certifications and training as well as experiential learning within the selected sector. Experiential learning through a cooperative education opportunity enables students to refine, extend, apply, and practice the sector specific knowledge and skills acquired in the bundle of credits.

Students who successfully complete all requirements receive the Specialist High Skills Major designation on their Ontario Secondary School diploma.

FRENCH IMMERSION & ADVANCED PLACEMENT

Le français est la clé...
Penser, comprendre, apprendre
Since 1977

French Immersion

Hammarskjold High School offers a French Immersion Diploma to students wishing to continue their study of the French language. To obtain the Diploma, students are required to take ten credits with French as the language of instruction. Four of these credits must be French Immersion language credits. The French Immersion program offers compulsory courses in French, including:

Geography of Canada | Grade 9;
Healthy Active Living Education | Grade 9;
Civics | Grade 10;
Career Studies | Grade 10; and
Canadian History since WWI | Grade 10.

For the other French credits, students choose additional courses from the following:

Food and Nutrition | HFN20F;
Cooperative Education | DCO30F;
Healthy Active Living Education | PPL20F;
Food and Culture | HFC3MF; and
Introduction to Anthropology, Sociology, and
Psychology | HSP3UF.

Additional French credits may be available online.

The variety of course offerings and full immersion experiences provide students with ample opportunities to enhance and refine their oral and written French language skills through structured and unstructured daily interaction. In addition, students will expand their knowledge of the language through the study of francophone culture and literature.

By the end of the four year program, students will participate easily in conversations and discussions, will be able to take courses at the college or university level in which French is the language of instruction, and will be able to accept employment where French is the working language.

Hammarskjold is proud to be a partner in the Centre DELF-DALF du Nord Ouest Ontario (Accredited Testing Centre) providing the opportunity for our Grade 12 students, upon successful completion of the DELF scolaire test, to obtain an internationally-recognized DELF certificate.

Exchange programs through ISE Ontario are available to further enhance language proficiency skills. For details, visit iseontario.on.ca

Advanced Placement

Hammarskjold High School is pleased to offer students Advanced Placement courses at the senior level. Advanced Placement is a cooperative educational partnership between the high school and post secondary institutions. Advanced Placement provides students with an enriched learning experience by enhancing the depth and/or breadth of additional academic content as identified by post secondary institutions. Successful completion of the external AP examination(s) may exempt students from certain university courses. AP courses offered at Hammarskjold include Grade 11 English and Grade 12 English, Grade 12 Mathematics and Grade 12 French. Students may also choose to challenge an AP exam in any subject area offered by the AP College Board. This can be facilitated through the school's AP coordinator.

Pre-Advanced Placement

Students considering AP subjects at the senior level begin preparing and challenging themselves in the methods of AP skills development in Pre-AP Mathematics, English and French.

Final evaluation is based upon the successful completion of subject specific Ontario curriculum expectations. Enrichment opportunities within these subject areas allow students to challenge themselves and determine whether they wish to further pursue AP opportunities.

OSSD DIPLOMA REQUIREMENTS

If you started Grade 9 in Fall 2024 and after

If you started Grade 9 in 2024 or in later years, you need the following to get your OSSD. Notice that you need 17 compulsory credits, including one credit in the STEM related course group.

Compulsory Credits

You need the following **17 compulsory credits** to get your OSSD:

- 4 credits in English (1 credit per grade)
- 3 credits in mathematics (Grade 9, Grade 10 and 1 credit in Grade 11 or 12)
- 2 credits in science
- 1 credit in technological education (Grade 9 or Grade 10)
- 1 credit in Canadian history (Grade 10)
- 1 credit in Canadian geography (Grade 9)
- 1 credit in the arts
- 1 credit in health and physical education
- 1 credit in French as a second language or Native language
- 0.5 credit in career studies
- 0.5 credit in civics and citizenship
- 1 credit from the STEM-related course group

The following apply to compulsory credit selections.

- You can use the Grade 11 English: Understanding Contemporary First Nations, Métis and Inuit Voices course to meet the Grade 11 English compulsory credit requirement.
- You can use the Grade 9 Expressions of First Nations, Métis, and Inuit Cultures course to meet the compulsory credit requirement in the arts.

STEM-related course group

Of the 17 compulsory credits, you must complete 1 from the following group:

- business studies
- computer studies
- cooperative education
- mathematics (in addition to the 3 compulsory credits currently required)
- science (in addition to the 2 compulsory credits currently required)
- technological education (in addition to the 1 compulsory credit required)

Optional credits

You must earn **13 optional credits** by successfully completing courses from your school's program and course calendar.

Optional credits may include up to 4 credits earned through approved dual credit programs.

Additional Requirements:

- 40 hours of community involvement activities
- Ontario Secondary School Literacy Requirement (OSSLT or OSSLC)
- Financial Literacy Requirement (starting for students who begin Grade 9 in 2025).
- 2 online credits (which make up any of the of the compulsory or optional credits). Students can opt out with parental permission. Contact your school guidance department to discuss opting out.

If you started Grade 9 in or before Fall 2023

If you started Grade 9 in 2023 or earlier, you need the following to get your OSSD. Notice that you need 18 compulsory credits and follow the Group 1, 2 and 3 lists.

Compulsory Credits

You need the following **18 compulsory credits** to get your OSSD:

- 4 credits in English (1 credit per grade)
- 3 credits in mathematics (at least 1 credit in Grade 11 or 12)
- 3 credits for group 1, 2 and 3 courses (1 credit in each group)
- 2 credits in science
- 1 credit in Canadian history (Grade 10)
- 1 credit in Canadian geography (Grade 9)
- 1 credit in the arts
- 1 credit in health and physical education
- 1 credit in French as a second language or Native Language
- 0.5 credit in career studies
- 0.5 credit in civics and citizenship

The following also apply to compulsory credit selections.

- You can use the Grade 11 English: Understanding Contemporary First Nations, Métis and Inuit Voices course to meet the Grade 11 English compulsory credit requirement.
- You can use the Grade 9 Expressions of First Nations, Métis, and Inuit Cultures course to meet the compulsory credit requirement in the arts.

Group 1, 2 and 3 compulsory credits

Of the 18 compulsory credits, you must complete 1 from each of the following groups:

Group 1: English (including the Ontario Secondary School Literacy Course) or French as a second language, Native languages, First Nations, Métis, and Inuit studies, classical studies and international languages, social sciences and the humanities, Canadian and world studies, guidance and career education, cooperative education, American Sign Language as a second language

Group 2: health and physical education, the arts, business studies, French as a second language, cooperative education, American Sign Language as a second language

Group 3: science (Grade 11 or 12), technological education, French as a second language, computer studies, cooperative education. American Sign Language as a second language

The following conditions apply to selections from the above three groups: A maximum of 2 credits in French as a second language may count as additional compulsory credits, 1 credit from Group 1, and 1 credit from either Group 2 or 3. A maximum of 2 credits in cooperative education may count as additional compulsory credits, selected from any of Groups 1, 2, or 3.

Optional credits

You must earn **12 optional credits** by successfully completing courses from your school's program and course calendar.

Optional credits may include up to 4 credits earned through approved dual credit programs.

Additional Requirements:

- 40 hours of community involvement activities
- 2 online credits
- Ontario Secondary School Literacy Requirement (OSSLT or OSSLC)

Your Individual Pathways Plan (IPP)

All Ontario secondary students will create their own Individual Pathways Plan (IPP). This is the primary planning tool that you will use as you move through school to your initial post-secondary destination.

Your Individual Pathways Plan (IPP) will help you find the answers.

Everything you learn about courses, careers and pathways will be stored in your IPP. You will be able to access all this valuable information as you begin planning your life after high school.

A career is your path through life.

In high school, you will have to make decisions about education, learning, different jobs, work (paid and unpaid), family life, friendships, community involvement and leisure activities.

Career development requires you to understand who you are and what opportunities you have in both the world and the workplace, so that you can begin to make decisions about your future. Career development involves understanding your own strengths and interests, goal-setting, decision-making and awareness of opportunities.

Jobs in the future will belong to people with skills, attitudes and behaviours that include academic abilities, personal management skills and teamwork strategies.

You will need to have good work habits and the ability to make sound decisions, solve problems, plan effectively, work independently, communicate well, do research, evaluate yourself realistically, and explore new educational and career opportunities.

Student Services Guidance Counsellors will be a valuable resource for searches, course selection, career exploration, support and so much more. Talk to your counsellor about your ideas, goals, and dreams.

Explore Options, Goals & Plans

Use this walkthrough to learn about Explore Options and Goals & Plans. These activities help students open their eyes to the many different futures available to them. Once they've been introduced to the wide range of careers, have delved into self-knowledge, and have defined a goal, Xello prompts them to come full circle and narrow the pathways required to reach those future goals.

Explore Options

Whether you want to start your journey by exploring careers, schools, or majors, you can start from Explore Options. Let's start with Careers.

Explore Careers

- Select **Explore Options** in the top menu.
- Select **Careers** and you'll see your top 20 best-matched careers. By default, careers are sorted by the strength of

your match to the career: Excellent, Good, Fair, or Poor.

- Browse through the list and select **View More** to see another 20 careers. You can keep expanding the list.

TIP: Explore the dynamic filters by clicking More Filters. You can narrow your list based on factors like earnings, related clusters, and job outlook.

Deep Dive on a Career

Xello includes hundreds of career profiles that are accessible and engaging. To view a career profile, select a career that interests you. Select **Find Out Why** to see how the answers you gave in your assessments contributed to your match score.

Select **Save** next to the heart icon to save a favourite career, indicate how you feel about it, and explore further with investigative prompts.

Make your way to the bottom of the career profile page, scrolling past the job description, earnings, and down to the education and training; you'll see a list of links under Related Programs. Choose one to take you to Explore Programs.

TIP: Saving your options will help you experience a curated Xello journey as activities are specially tuned to your interests and favourites. You can visit your saved options from any page by clicking the heart icon in the top menu bar.

Explore Programs

Once on the Explore Programs page, the link you chose from the career profile will be applied as a filter to the program results. Apply other filters to further narrow results.

Time to Explore!

Choose a program to bring up its profile. On each program you will see details such as admission requirements, costs, similar programs, at this and other schools. From the right of the profile, select **Save** to record it to your favourites.

TIP: You can access Programs and Schools from the top of any page.

Explore Schools

To explore more about the specific school, select the school name under the section titled **Offered By**. From here you can learn about cost, enrollment, programs, campus housing, similar schools, and even the local weather, and an interactive campus map. Select **Save** to record it to your favourites.

Xello works hard to prompt you to discover a path that parallels your skills and interests, but sometimes your best inspiration will be stumbled upon by surprise. So if you'd like to cut loose

and browse all careers, schools, and programs, select the **Explore Options** link again and select the appropriate section to begin exploring, applying filters, and saving your favourites.

Goals & Plans

Once you've explored your career, program, and school options, bring your knowledge full circle and build a plan to connect all the dots. From the navigation bar at the top of the page, select **Goals & Plans** and then **Create Plan**.

Choose one of the three starting points: career, school, or program; and give your plan a name. Select **Next** and use your saved options to choose a path in your future.

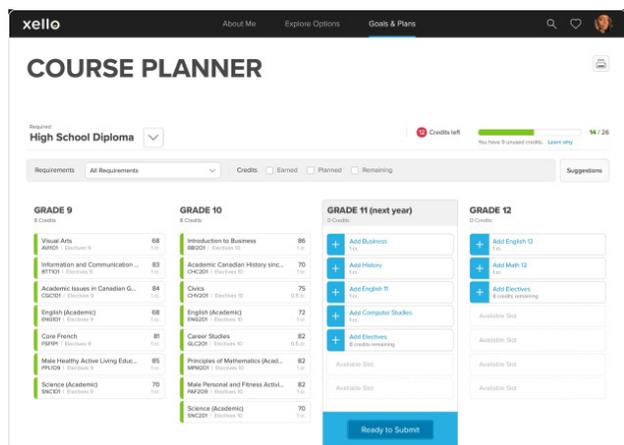

Once completed, you can personalize your plan by adding comments and media to your storyboard. Create multiple plans and compare them on the Goals & Plans page.

Stay up-to-date on everything that's happening at school with Edsby. Edsby is an online learning management system that connects students, parents and teachers. Login to Edsby to stay up to date on classwork, grades and learning resources. Edsby will even remind you when something is due - whether it is to hand in an assignment, or to go to soccer practice.

Use your Office ID to login to Edsby at lakehead.edsby.com or download the Edsby app from your app store.

XELLO

Xello is the web-based planner you will use to manage your IPP. It is also the course selection tool that will help you set up your high school courses in alignment with your graduation requirements and career goals.

Need2Know

Current Grade 9s

For Grade 10, you will have five compulsory courses plus three electives.

Current Grade 10s

You will take an English and a Math course, plus six other elective credits. You should be considering your Groups 1, 2, and 3, as well as prerequisites you may be required to take in Grade 12 for Apprenticeship, College or University programs after high school.

Current Grade 11s

You are choosing your one English and at least five other courses. You must ensure you will graduate with a minimum of 30 credits including 18 compulsory credits.

If you have attempted the Ontario Secondary School Literacy Test at least twice and have been unsuccessful, you should include OLC40 as a course choice.

Please note: If you received 50% in a course, you should talk to your subject teacher about the appropriate next step.

Students wishing to attend college or university are reminded that they must meet specific entrance requirements:

University – at least six (6) Grade 12 “U” or “M” courses and in many cases a designated overall average (70% for Lakehead University).

Students must also meet courses prerequisites for certain post secondary programs.

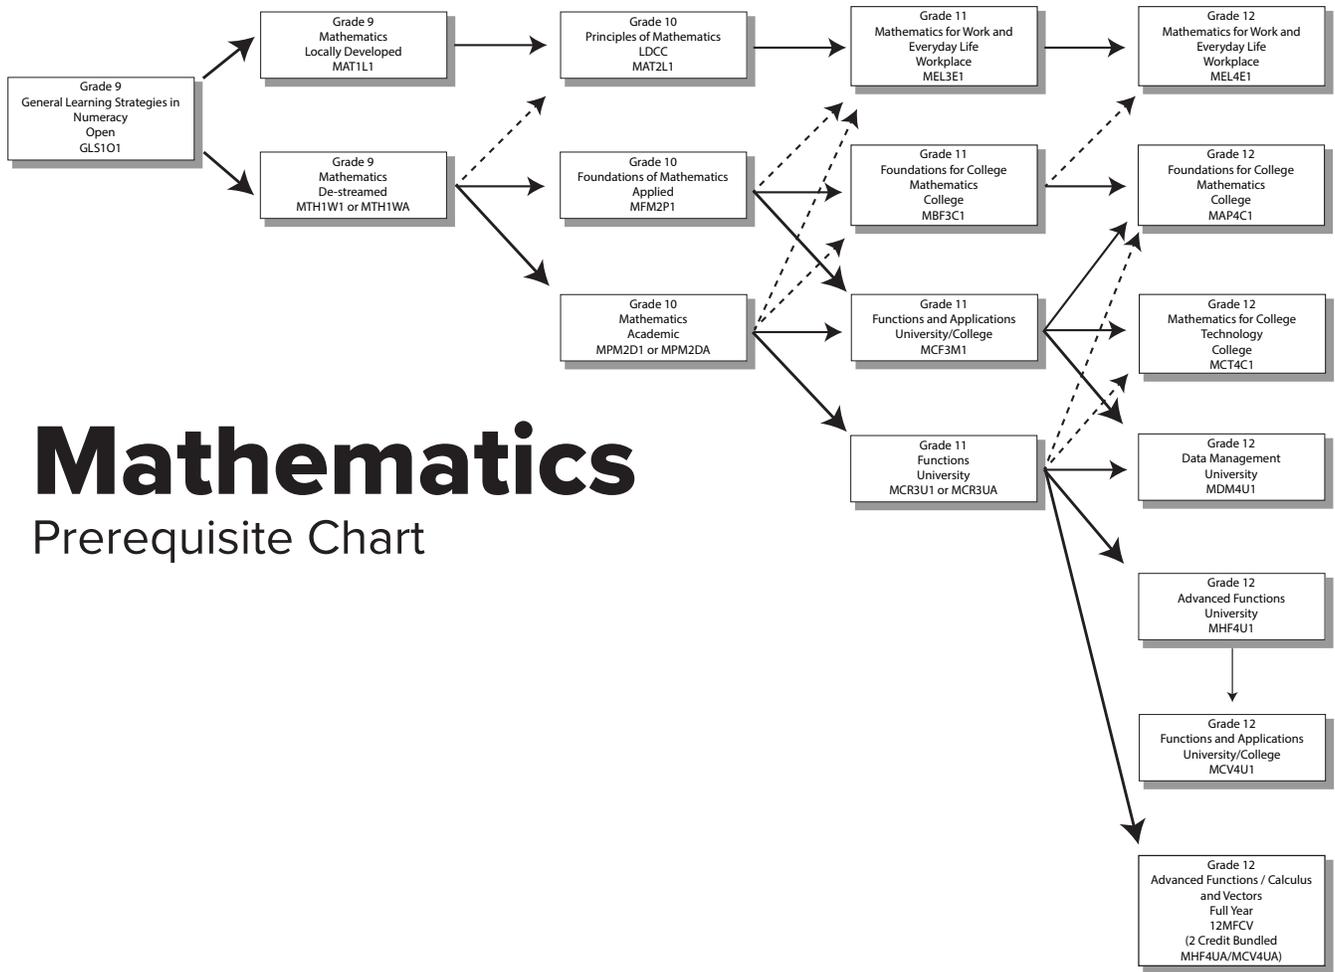

For a comprehensive list of Universities and programs, as well as prerequisites and admissions requirements, visit: www.ontariouniversitiesinfo.ca

College – at least Grade 12, College English. Specific senior mathematics courses are also required for technology programs.

To explore college programs and admissions requirements, visit: www.ontariocolleges.ca

For more information on trades, visit: www.skilledtrades.ca

Students are reminded that it may be difficult or impossible to change a course once school starts in September.

Course selections made in February for the following year are the basis upon which classes are structured and staff is assigned. After staffing and the school's master timetable are established, subsequent changes in a student's program are possible but very much restricted, and are considered if timetable and class size permit.

Where enrolment is insufficient, a course may be canceled.

Innovative, exciting and flexible opportunities are available that allow students to earn credits towards their diploma in many unique and varying environments. Whether online, in a career setting, post-secondary institution, or other educational facility, students participating in these programs work hands-on and build the skills and knowledge necessary to ensure their successful transition to their post secondary career of choice. Many of these programs also provide free certifications, recognized training, or reach ahead experiences to help students further focus their career pathway. All students can benefit from participation in these equal access programs. Students select courses online using Xello during February.

See the Senior Specialist: Focus section of this calendar p. 28-29 for more information about how a senior focus of study might just be what you are looking for.

Additional information is available at Student Services.

eLearning at LPS - 2026-2027

Students may earn Ontario high school credits online through the Lakehead District School Board eLearning Program. Students taking an e-learning course will receive their instruction, assignments and tests online at the eLearning site www.lakeheadschoools.ca/elearning/. Participating students will be given face-to-face initial training on how to use the site and meet their teacher at the start of the semester. These courses meet all curriculum expectations and are taught by fully qualified teachers in one of our three high schools.

- Enjoy the flexibility of an eLearning online course
- Computer access available
- Dedicated eLearning teacher contact, support and assistance, including a help desk.
- Qualify by enrolling in at least two per semester – other day school courses.

Please check with Student Services to confirm the semester when courses will be offered.

COURSE DESCRIPTIONS

THE ARTS

Drama

Drama **ADA201**
Grade 10 **Open**

This course provides opportunities for students to explore dramatic forms, conventions, and techniques. Students will explore a variety of dramatic sources from various cultures and representing a range of genres. Students will use the elements of drama in creating and communicating through dramatic works. Students will assume responsibility for decisions made in the creative and collaborative processes and will reflect on their experiences.

Prerequisite: None

Drama **ADA3M1**
Grade 11 **University/College**

This course requires students to create and perform in dramatic presentations. Students will analyse, interpret, and perform dramatic works from various cultures and time periods. Students will research various acting styles and conventions that could be used in their presentations, and analyse the functions of playwrights, directors, actors, designers, technicians, and audiences.

Prerequisite: ADA101 or ADA201

Drama **ADA4M1**
Grade 12 **University/College**

This course requires students to experiment individually and collaboratively with forms and conventions of both drama and theatre from various cultures and time periods. Students will interpret dramatic literature and other text and media sources while learning about various theories of directing and acting. Students will examine the significance of dramatic arts in various cultures, and will analyse how the knowledge and skills developed in drama are related to their personal skills, social awareness, and goals beyond secondary school. **Prerequisite: ADA3M1**

Music

Music - Band **AMI201**
Grade 10 **Open**

This course emphasizes the creation and performance of music at a level consistent with previous experience. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop their understanding of musical conventions, practices, and terminology and apply the elements of music in a range of activities. They will also explore the function of music in society with reference to the self, communities, and cultures.

Prerequisite: None *AMI101 is strongly recommended

Music - Vocal/Choral **AMV201**
Grade 10 **Open**

This course emphasizes the creation and performance of music at a level consistent with previous experience. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop their understanding of musical conventions, practices, and terminology and apply the elements of music in a range of activities. They will also explore the function of music in society with reference to the self, communities, and cultures. The above will be achieved through the study of vocal music.

Prerequisite: None

Music - Guitar **AMG201**
Grade 10 **Open**

Music - Guitar **AMG20R**
Grade 10 **Open**

This course is for Grade 10 students who have not taken Grade 9 Guitar.

Music - Strings **AMS201**
Grade 10 **Open**

Prerequisite: None *AMS101 is strongly recommended

Music - Band **AMI3M1**
Grade 11 **University/College**

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis processes when reflecting on, responding to, and analysing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers.

Prerequisite: AMI201

Music - Vocal/Choral **AMV3M1**
Grade 11 **University/College**

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis process when reflecting on, responding to and analyzing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers. The focus of this course is contemporary music.

Prerequisite: Any Grade 9 or 10 Music course

Music - Repertoire * **AMR3M1**
Grade 11 **University/College**

Prerequisite: AMI201 or AMS201

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyze how to apply skills developed in music to their life and careers.

Prerequisite: AMI201 or AMS201

**This course will be offered after school from 3:40 p.m. - 5:10 p.m. two days per week for the full school year, and is in addition to your regular course selections. Please see Mr. Pepe or Mrs. DeLeon to register for this course*

Music - Strings **AMS301**
Grade 11 **University/College**

Prerequisite: AMS101 or 201

Music - Guitar **AMG301**
Grade 11 **Open**

This course develops students' musical literacy through performance and the preparation and presentation of music productions. Students will perform works at a level consistent with previous experience. Independently and collaboratively, students will use current technology and the creative and critical analysis processes to plan, produce, present, and market musical productions. Students will respond to, reflect on, and analyse music from various genres and periods, and they will develop skills transferable to other aspects of their life and their careers. Students should have guitar proficiency at the Grade 10 level.

Prerequisite: AMG101 or AMG201

Music - Vocal/Choral **AMV4M1**
Grade 12 **University/College**

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music, and will respond with insight to live and record performances. Students will embrace their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyze how to apply skills developed in music to their life and careers. The focus of this course is contemporary music.

Prerequisite: Any Grade 11 Music course

Music - Band
Grade 12

This course enables students to enhance their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyse how to apply skills developed in music to their life and careers.
Prerequisite: AMI3M1

AMI4M1
University/College

Music - Guitar
Grade 12
Prerequisite: AMG3M1

AMG4M1
University/College

Music - Strings
Grade 12
Prerequisite: AMS3M1

AMS4M1
University/College

Music - Repertoire *
Grade 11/12

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyze how to apply skills developed in music to their life and careers.

Prerequisite: AMI2O1 or AMS2O1 or AMI3M1 or AMS3M1 or AMR3M1

** This course will be offered after school from 3:40 p.m. - 5:10 p.m. two days per week for the full school year, and is in addition to your regular course selections. Please see a music teacher to register for this course*

AMR3M1/AMR4M1
University/College

Visual Arts

Visual Arts
Grade 10

This course enables students to develop their skills in producing and presenting art by introducing them to new ideas, materials, and processes for artistic exploration and experimentation. Students will apply the elements and principles of design when exploring the creative process. Students will use the critical analysis process to reflect on and interpret art within a personal, contemporary, and historical context.

Prerequisite: None

AVI2O1
Open

Visual Arts
Grade 11

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emergent technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular artform (e.g. photography, video, computer graphics, information design).

Prerequisite: AVI1O1 or AVI2O1

AVI3M1
University/College

Visual Arts - Photography
Grade 11 - eLearning

In this course, students will learn about photography as an expressive art form. Design theory as it relates to photography as an artistic medium is an essential component of this course, and the history of art as it relates to photography will also be included. Students will focus on an exploration of digital imaging and manipulation in their studio projects. This course is recommended for students who, in addition to furthering their enjoyment in the visual arts, wish to develop skills that relate strongly to the workplace, such as creative problem solving, time management, organization, mentorship, and collaboration.

Prerequisite: None

AWQ3OE
Open

Visual Arts
Grade 12

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts.

Prerequisite: AVI3M1 or 3O1

AVI4M1
University/College

BUSINESS STUDIES

Accounting

Financial Accounting Fundamentals
Grade 11 - eLearning

This course introduces students to the fundamental principles and procedures of accounting. Students will develop financial analysis and decision-making skills that will assist them in future studies and/or career opportunities in business. Students will acquire an understanding of accounting for a service and a merchandising business, computerized accounting, financial analysis, and current issues and ethics in accounting

Prerequisite: None

BAF3ME
University/College

Business

Launching and Leading a Business
Grade 10

This course introduces students to the world of business and what is required to be successful, ethical, and responsible in today's economy. Students will develop the knowledge and skills needed to be an entrepreneur who knows how to respond to local and global market opportunities. Throughout the course, students will explore and understand the responsibility of managing different functions of a business. This includes accounting, marketing, information and communication technology, financial management, human resources, and production.

Prerequisite: None

BEP2O1
Open

Marketing

Marketing: Goods, Services, Events
Grade 11 - In class or eLearning

This course introduces the fundamental concepts of marketing, which includes the marketing of goods, services, and events. Students will examine how trends, issues, global economic changes, and information technology influence consumer buying habits. Students will engage in marketing research, develop marketing strategies, and produce a marketing plan for a product of their choice.

Prerequisite: None

BM13C1/E
College

International Business

International Business Fundamentals
Grade 12 - In class or eLearning

This course provides an overview of the importance of international business and trade in the global economy and explores the factors that influence success in international markets. Students will learn about the techniques and strategies associated with marketing, distribution, and managing international business effectively. This course prepares students for post secondary programs in business, including international business, marketing, and management.

Prerequisite: None

BBB4M1/E
University/College

Business Leadership

Business Leadership Management
Grade 12 - eLearning

This course focuses on the development of leadership skills used in managing a successful business. Students will analyse the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized.

Prerequisite: None

BOH4ME
University/College

CANADIAN AND WORLD STUDIES

Travel and Tourism: A Geographic Perspective

Grade 11 - eLearning

CGG30E

Open

This course focuses on issues related to travel and tourism within and between various regions of the world. Students will investigate unique environmental, sociocultural, economic, and political characteristics of selected world regions. They will explore travel patterns and trends as well as tensions related to tourism, and will predict future tourism destinations. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate the impact of the travel industry on natural environments and human communities.

Prerequisite: None

Civics (Politics)

Civics & Citizenship

Grade 10

0.5 Credit

CHV205

Open

This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance such as healthy schools, community planning, environmental responsibility, and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them.

Prerequisite: None

Civics & Citizenship

Grade 10 - 0.5 Credit - (French Immersion)

Eligibility: Open to all students

CHV20F

Open

History

Canadian History since World War I

Canadian History since World War I (French Immersion)

Grade 10

CHC2D1

CHC2DF

Academic This course explores social, economic, and political developments and events and their impact on the lives of different groups in Canada since 1914. Students will examine the role of conflict and cooperation in Canadian society, Canada's evolving role within the global community, and the impact of various individuals, organizations, and events on Canadian identity, citizenship, and heritage. They will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key issues and events in Canadian history since 1914.

Prerequisite: None

Canadian History since World War I

Grade 10

This course focuses on the social context of historical developments and events and how they have affected the lives of people in Canada since 1914. Students will explore interactions between various communities in Canada as well as contributions of individuals and groups to Canadian heritage and identity. Students will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating the continuing relevance of historical developments and how they have helped shape communities in present-day Canada.

Prerequisite: None

CHC2P1

Applied

First Nations, Métis, and Inuit Peoples in Canada

Grade 10

This course explores First Nations, Métis, and Inuit peoples' relationships with Canada from pre-contact to the 21st century. Students will examine social, economic, political and military interactions that impact the contemporary realities of Aboriginal people in Canada in relation to identity, culture, community, land, and governance. Students will explore their own and others' ideas using the historical inquiry process to think critically and respond responsibly about civic questions raised today as a result of the changing relationships.

Prerequisite: None

NAC201

Open

World History to the End of the Fifteenth Century

Grade 11

This course explores the history of various societies and civilizations around the world, from earliest times to around 1500 CE. Students will investigate a range of factors that contributed to the rise, success, and decline of various ancient and pre-modern societies throughout the world and will examine life in and the cultural and political legacy of these societies. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating social, political, and economic structures and historical forces at work in various societies and in different historical eras.

Prerequisite: CHC2P1 or 2D1

CHW3M1

University/College

World History since the Fifteenth Century

Grade 12

This course traces major developments and events in world history since approximately 1450. Students will explore social, economic, and political changes, the historical roots of contemporary issues, and the role of conflict and cooperation in global interrelationships. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate key issues and ideas and assess societal progress or decline in world history.

Prerequisite : Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

CHY4U1

University

Law

Understanding Canadian Law

Grade 11

This course explores Canadian law, with a focus on legal issues that are relevant to the lives of people in Canada. Students will gain an understanding of laws relating to rights and freedoms in Canada; our legal system; and family, contract, employment, tort, and criminal law. Students will develop legal reasoning skills and will apply the concepts of legal thinking and the legal studies inquiry process when investigating a range of legal issues and formulating and communicating informed opinions about them.

Prerequisite: CHC2D1 or 2P1.

CLU3M1

University/College

Canadian and International Law

Grade 12 - In class or eLearning

This course explores a range of contemporary legal issues and how they are addressed in both Canadian and international law. Students will develop an understanding of the principles of Canadian and international law and of issues related to human rights and freedoms, conflict resolution, and criminal, environmental, and workplace law, both in Canada and internationally. Students will apply the concepts of legal thinking and the legal studies inquiry process, and will develop legal reasoning skills, when investigating these and other issues in both Canadian and international contexts.

Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

CLN4U1/E

University

Legal Studies

Grade 12

This course provides a foundation for students who wish to pursue a career that requires an understanding of law. Students will explore the importance of law, analysing contemporary legal issues and their relevance to daily life. They will investigate the requirements for various law-related careers as well as legal responsibilities in the workplace. Students will apply the concepts of legal thinking and the legal studies inquiry process to investigate their rights and responsibilities, legal processes and structures, and the role of law in a changing society.

Prerequisite: CHV205

CLN4C1

College

COMPUTER STUDIES

Intro to Computer Science

Grade 11

This course introduces students to computer science. Students will design 2D and 3D video games independently and as part of a team, using industry-standard game development tools and applying the software development life-cycle model. They will also design array algorithms and write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore emerging research in computer science, and global career trends in computer-related fields.

Prerequisite: None

ICS3U1

University

Introduction to Computer Programming (Game Objects and Algorithms)
Grade 11
 This course introduces students to computer programming concepts and practices. Students will write and test computer programs, using various problem-solving strategies. They will learn the fundamentals of program design and apply a software development life-cycle model to a software development project. Students will also learn about computer environments and systems, and explore environmental issues related to computers, safe computing practices, emerging technologies, and postsecondary opportunities in computer-related fields.
Prerequisite: None

ICS3C1

College

Computer Science
Grade 12
 This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyze algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, and computer-related careers.
Prerequisite: ISC3U1

ICS4U1
 University

Computer Programming
Grade 12
 This course further develops students' computer programming skills. Students will learn object-oriented programming concepts, create object-oriented software solutions, and design graphical user interfaces. Student teams will plan and carry out a software development project using industry-standard programming tools and proper project management techniques. Students will also investigate ethical issues in computing and expand their understanding of environmental issues, emerging technologies, and computer-related careers.
Prerequisite: ISC3C1

ICS4C1
 College

ENGLISH

Compulsory Courses

English
Grade 10
 This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyse literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course or English: Contemporary Aboriginal Voices, Grade 11, University - NBE3U1.
Prerequisite: ENL1W1

ENG2D1
 Academic

English
Grade 10
 This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will study and create a variety of informational, literary, and graphic texts. An important focus will be on the consolidation of strategies and processes that help students interpret texts and communicate clearly and effectively. This course is intended to prepare students for the compulsory Grade 11 college or workplace preparation course or Contemporary Aboriginal Voices, Grade 11 college preparation course.
Prerequisite: ENL1W1

ENG2P1
 Applied

English
Grade 10
 In this course, students focus on extending their literacy and communication skills to prepare for success in their daily lives, in the workplace, in the English Grade 11 Workplace course, or in the English: Contemporary Aboriginal Voices, Grade 11 Workplace course. The course is organized into strands that extend listening and talking skills, reading and viewing skills, and writing skills. In all strands, the focus is on refining foundational literacy skills and on using language clearly and accurately in a variety of authentic contexts. Students build on their strategies and engage in the processes involved in talking, listening, reading, viewing, writing and thinking, and reflect regularly upon their growth in these areas.
Prerequisite: ENG1L1

ENG2L1
 LDCC

English: Understanding Contemporary First Nation, Métis and Inuit Voices
NBE3U1

Grade 11 - In Class or eLearning
University
 This course explores themes, forms, and stylistic elements of a variety of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also examines the perspectives and influence of texts that relate to those cultures. In order to fully understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will analyse the changing use of text forms by Indigenous authors/creators from various periods and cultures in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English university or college preparation course. **New: NBE3U1 now replaces the ENG3U1**
Prerequisite: ENG2D1

Media Studies
Grade 11 - eLearning
EMS3OE
Open
 This course emphasizes knowledge and skills that will enable students to understand media communication in the twenty-first century and to use media effectively and responsibly. Through analyzing the forms and messages of a variety of media works and audience responses to them, and through creating their own media works, students will develop critical thinking skills, aesthetic and ethical judgement, and skills in viewing, representing, listening, speaking, reading, and writing.
Prerequisite: ENG2D1 or ENG2DA or ENG2P1

English - Advanced Placement
Grade 11
ENG3UA
University
 This AP English Language and Composition course is designed to help students become skilled readers of prose written in a variety of rhetorical contexts and to become skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer's purposes, audience expectations, and subjects as well as the way language conventions and the resources of language contribute to effectiveness in writing. The course is intended to prepare students for the compulsory Grade 12 university or college prerequisite course. A high level of success on the AP English Language and Composition examination could qualify a student for a university credit.
Prerequisite: ENG2D1

English: Understanding Contemporary First Nations, Métis, and Inuit Voices
Grade 11
NBE3C1
College
 This course explores the themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also looks at the perspectives and influences of texts that relate to those cultures. In order to understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will study the use of text forms by Indigenous authors/creators from other periods in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English college preparation course.
Prerequisite: ENG2P1 or ENG2D1

English: Understanding Contemporary First Nations, Métis, and Inuit Voices
Grade 11
NBE3E1
Workplace
 This course explores the themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, as well as some texts that relate to those cultures. In order to better understanding contemporary texts, students will explore connections between traditional and contemporary text forms and cultural and community aspects of identity, relationships, and self-determination, sovereignty, or self-governance. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English college preparation course.
Prerequisite: ENG2P1 or ENG2L1

**English - Advanced Placement
Grade 12**

The AP English Literature and Composition course is designed to engage students in the careful reading and critical analysis of imaginative literature. Through the close reading of selected texts, students can deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readings. As they read, students will consider structure, style and themes, as well as the use of figurative language, imagery, symbolism, and tone. The course is intended to prepare students for success in the AP examination and for university, college or the workplace. A high level of success on the Literature and Composition AP examination could qualify the student for university credit.

Prerequisite: ENG3U1/A or NBE3U1

**ENG4UA
University**

**English
Grade 12 - In class or eLearning**

This course emphasizes consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace.

Prerequisite: ENG3U1/A or NBE3U1

**ENG4U1/E
University**

**English
Grade 12**

This course emphasizes consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a variety of informational and graphic texts, as well as literary texts from various countries and cultures, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity and developing greater control in writing. The course is intended to prepare students for college or the workplace.

Prerequisite: NBE3U1 or NBE3C1

**ENG4C1
College**

**English
Grade 12**

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in the workplace and in daily life. Students will analyse informational, graphic, and literary texts and create oral, written and media texts in a variety of forms for workplace-related and practical purposes. An important focus will be on using language accurately and organizing ideas and information coherently. The course is intended to prepare students for the workplace and active citizenship.

Prerequisite: ENG3E1 or NBE3E1

**ENG4E1
Workplace**

**The Writer's Craft
Grade 12 - eLearning**

This course emphasizes knowledge and skills related to the craft of writing. Students will analyse models of effective writing; use a workshop approach to produce a range of works; identify and use techniques required for specialized forms of writing; and identify effective ways to improve the quality of their writing. They will also complete a major paper as part of a creative or analytical independent study project and investigate opportunities for publication and for writing careers.

Prerequisite: ENG3U1 or 3UA or NBE3U1

**EWC4UE
University**

**Ontario Secondary School Literacy Course
Grade 12**

This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing.

**OLC4O1
Open**

FIRST NATIONS, MÉTIS, AND INUIT LANGUAGES

**FNMI Languages: Ojibwe
Level 1**

This course is open to the entire student body and will allow students who have no prior Native language experience to develop an appreciation for a Native language and culture, to explore and experience a unique world view, and to learn to speak a Native language. Students will use the language being studied for greetings and daily routines, become familiar with its writing and sound system, and practise basic vocabulary and phrases. Students will also use information technology during course-related activities.

Prerequisite: None

**LNOA01
Open**

**FNMI Languages: Ojibwe
Level 2**

This course will enable students to experience the unique respect for life that permeates Native languages and cultures. Students will expand their vocabulary and knowledge of phrases and expressions, using them in simple dialogues, narrative writing, grammatical constructions, and reading, and to exchange information electronically. **This course is open to any student who has successfully completed at least four years of elementary Native language study, has successfully completed FNMI Languages: Level 1, or demonstrates the required proficiency.**

**LNOB01
Open**

FIRST NATIONS, MÉTIS, AND INUIT STUDIES

**Expressions of First Nations, Métis, and Inuit Cultures
Grade 9**

This course explores various arts disciplines (dance, drama, installation and performance art, media arts, music, storytelling, utilitarian or functional art, visual arts), giving students the opportunity to create, present, and analyse art works, including integrated art works/ productions, that explore or reflect First Nations, Métis, and Inuit perspectives and cultures. Students will examine the interconnected relationships between art forms and individual and cultural identities, histories, values, protocols, and ways of knowing and being. They will demonstrate innovation as they learn and apply art-related concepts, methods, and conventions, and acquire skills that are transferable beyond the classroom. Students will use the creative process and responsible practices to explore solutions to creative arts challenges.

Prerequisite: None

**NAC101
Open**

**First Nations, Métis, and Inuit in Canada
Grade 10**

This course explores the histories of First Nations and Inuit in Canada from precontact, as well as Métis from their beginnings, to the present day. Students will examine the continuing impact of past social, cultural, economic, political, and legal trends and developments on First Nations, Métis and Inuit individuals and communities. Students will apply the concepts of historical thinking and the historical inquiry process to investigate a range of issues, events, and interactions that have affected First Nations, Métis, and Inuit individuals and communities, including those that continue to affect relations between Indigenous and non-Indigenous peoples in Canada.

Prerequisite: None

**NAC201
Open**

**English: Understanding Contemporary First Nations, Métis, and Inuit Voices
Grade 11**

This course explores the themes, forms, and stylistic elements of a variety of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also examines the perspectives and influence of texts that relate to those cultures. In order to fully understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or selfgovernance, students will analyse the changing use of text forms by Indigenous authors/ creators from various periods and cultures in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English university or college preparation course.

Prerequisite: ENG2D1

NBE3U1

University

English: Understanding Contemporary First Nations, Métis, and Inuit Voices NBE3C1

Grade 11 College

This course explores the themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also looks at the perspectives and influences of texts that relate to those cultures. In order to understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will study the use of text forms by Indigenous authors/creators from other periods in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English college preparation course.

Prerequisite: ENG2D1 or 2P1

English: Understanding Contemporary First Nations, Métis, and Inuit Voices NBE3E1/E

Grade 11 - In Class or eLearning Workplace

This course explores themes, forms, and stylistic elements of literary, informational, graphic, oral, cultural, and media texts emerging from First Nations, Métis, and Inuit cultures in Canada, as well as some texts that relate to those cultures. In order to better understand contemporary texts, students will explore connections between traditional and contemporary text forms and cultural and community aspects of identity, relationships, and self-determination, sovereignty, or self-governance. Students will also create oral, written, and media texts focusing on the development of literacy, communication, and critical thinking skills necessary for success in the workplace and daily life. The course is intended to prepare students for the compulsory Grade 12 English workplace preparation course.

Prerequisite: ENG2D1 or 2P1 or 2L1

FRENCH AS A SECOND LANGUAGE

Core French

Core French FSF2D1
Grade 10 Academic

This course provides opportunities for students to communicate in French about personally relevant, familiar, and academic topics in real-life situations with increasing independence. Students will exchange information, ideas, and opinions with others in guided and increasingly spontaneous spoken interactions. Students will develop their skills in listening, speaking, reading, and writing through the selective use of strategies that contribute to effective communication. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FSF1D1 or 1P1

Core French FSF3U1
Grade 11 University

This course offers students extended opportunities to speak and interact in real-life situations in French with greater independence. Students will develop their listening, speaking, reading, and writing skills, as well as their creative and critical thinking skills, through responding to and exploring a variety of oral and written texts. They will also broaden their understanding and appreciation of diverse French-speaking communities and will develop skills necessary for lifelong language learning.

Prerequisite: FSF2D1

Core French FSF4U1
Grade 12 University

This course provides extensive opportunities for students to speak and interact in French independently. Students will develop their listening, speaking, reading, and writing skills, apply language strategies in a wide variety of real-life situations, and develop their creative and critical thinking skills through responding to and interacting with a variety of oral and written texts. They will also enrich their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FSF3U1

French Immersion

French Immersion FIF2D1
Grade 10 Academic

This course provides students with extensive opportunities to communicate, interact, and think critically and creatively in French. Students will use a variety of language learning strategies in listening, speaking, reading, and writing, and will respond to and interact with print, oral, visual, and electronic texts. Students will develop their knowledge of the French language through the study of contemporary French literature and historically well-known French European literature. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FIF1D1

French Immersion FIF3U1
Grade 11 University

This course provides opportunities for students to consolidate the communication skills required to speak and interact with increasing confidence and accuracy in French in a variety of academic and social contexts. Students will use their skills in listening, speaking, reading, and writing and apply language learning strategies while exploring a variety of concrete and abstract topics. Students will increase their knowledge of the French language through the study of French literature from around the world. They will also deepen their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FIF2D1

French Immersion FIF4U1/A
Grade 12 University

This course provides students with extensive opportunities to communicate, interact, and think critically and creatively in French. Students will consolidate their listening, speaking, reading, and writing skills and apply language learning strategies while communicating about concrete and abstract topics, and will independently respond to and interact with a variety of oral and written texts. Students will study a selection of French literature from the Middle Ages to the present. They will also enrich their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: FIF3U1

GUIDANCE AND CAREER EDUCATION

Career Studies GLC205 (0.5 Credit)
Career Studies (French Immersion) GLC20F (0.5 Credit)

Grade 10 Open

This course teaches students how to develop and achieve personal goals for future learning, work, and community involvement. Students will assess their interests, skills, and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores post secondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan.

Prerequisite: None

Creating Opportunities through Cooperative Education DC0302
Creating Opportunities through Cooperative Education DC030F
2 Credit Open

Grade 11

This course consists of a learning experience connected to a community and a cooperative education curriculum focused on developing skills, knowledge, and habits of mind that will support students in their learning, including their education and career/life planning, at school and beyond, today and in the future. Within the context of their experience connected to a community, students will apply skills, knowledge, and habits of mind that will protect and promote their health, safety, and well-being and that will strengthen their inquiry, decision-making, and leadership skills. Students will create and implement a learning plan that meets their particular interests and needs, reflect on their learning, and make connections between their experience in the community and other aspects of their lives.

Prerequisite: None

Cooperative Education
Cooperative Education (French Immersion)
Grade 11/12
2 Credit

This course provides students with opportunities to develop the workplace essential skills and work habits required for success in all types of workplaces. Students will explore occupations and careers of interest through participation in real workplace experiences. They will make plan for continued learning and work, work with others to design learning experiences, and investigate the recourses and support required to make a smooth transition to their postsecondary destination.

Open - Summer Only

HEALTH AND PHYSICAL EDUCATION

Healthy Active Living Education
Healthy Active Living Education (French Immersion)
Grade 10

PPL201
PPL20F
Open

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Healthy Active Living Education - Edge Hockey Academy
Grade 10

PAI20H
Open

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

At the Grade 10 level, EDGE Hockey emphasizes advanced technical skill development, including detailed skating mechanics, puck-handling under pressure, and position-specific shooting and scoring techniques. Students also engage in skill-breakdown video analysis, small-area tactical games, and on-ice competitions that prepare them for higher-level play. Off the ice, students complete structured strength and conditioning sessions in the weight room and take part in multi-sport activities used across the physical education program.

Prerequisite: None

Healthy Active Living Education - Edge Hockey Academy
Grade 10

PAL20H
Open

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

The EDGE Hockey program expands student learning through structured full-ice gameplay, team systems instruction, and competitive 3-on-3 and 4-on-4 league-style formats that promote creativity and skill execution. Students deepen their understanding of game strategy while producing professional-style video content to highlight their progress and performance. Off the ice, students complete structured strength and conditioning sessions in the weight room and take part in multi-sport activities used across the physical education program.

Prerequisite: None

Healthy Active Living Education
Grade 11 -

PPL301
Open

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities and exposure to a broader range of activity settings, students enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Healthy Living and Large-Group Activities - Basketball Development
Grade 11

PAL30S
Open

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities and exposure to a broader range of activity settings, students enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

This course is designed to provide students with an enjoyable and inclusive environment where they can develop their basketball skills and gain a deeper understanding of the game. The emphasis is on learning through play, ensuring that participation is both engaging and rewarding. Students will refine fundamental skills such as dribbling, shooting, passing, and defense while applying movement principles to improve technique. Physical conditioning is also a key component, with activities aimed at enhancing speed, agility, mobility, and endurance specific to basketball. Through a variety of small-sided and full-court games, students will strengthen their ability to make effective decisions in game-like situations, learn strategies, and understand the rules of play. Beyond technical and physical development, the course promotes teamwork, sportsmanship, and communication, helping students build confidence and competence on and off the court. Leadership opportunities will be integrated into competitive games and group activities, encouraging students to take initiative and support their peers. In addition to skill and strategy, the program incorporates concepts of fitness, mobility, and overall health, ensuring a well-rounded approach to personal development through the sport of basketball.

Prerequisite: None (Proven basketball experience is an asset)

Personal and Fitness Activities
Grades 11/12

PAF301/PAF401
Open

This course focuses on the development of a healthy lifestyle through the introduction of lifelong fitness activities in a non-competitive classroom environment. Through the development of skills and practice in yoga, aerobics, swimming and aquatics, and a variety of athletic training methods, students will explore personal fitness goal-setting and lifelong physical well-being.

Prerequisite: None

Healthy Active Living Education
Grade 12

PPL401
Open

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Through participation in a wide range of physical activities in a variety of settings, students can enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

Health for Life
Grade 11 - eLearning

PPZ3CE
College

This course enables students to examine the factors that influence their own health practices and behaviours as well as those factors that contribute to the development of healthy communities. It emphasizes the concept of wellness, which addresses all aspects of well-being – physical, cognitive, emotional, spiritual and social – and promotes healthy eating, physical activity, and building and maintaining a positive sense of self. Students will develop the skills necessary to make healthy choices and create a personal wellness plan. They will also design initiatives that encourage others to lead healthy, active lives. The course prepares students for college programs in health sciences, fitness, wellness, and health promotion.

Prerequisite: None

Introductory Kinesiology
Grade 12 - In class or eLearning

PSK4U1/E
University

This course focuses on the study of human movement and of systems, factors, and principles involved in human development. Students will learn about the effects of physical activity on health and performance, the evolution of physical activity and sport, and the physiological, psychological, and social factors that influence an individual's participation in physical activity and sport. The course prepares students for university programs in physical education and health, kinesiology, health sciences, health studies, recreation, and sports administration.

Prerequisite:

Any Grade 11 University or University/College preparation course in science, or any Grade 11 or 12 course in Health and Physical Education

Personal and Fitness Activities
Grades 11/12

PAF301/401
Open

This course focuses on the development of a healthy lifestyle through the introduction of lifelong fitness activities in a non-competitive classroom environment. Through the development of skills and practice in yoga, aerobics, swimming and aquatics, and a variety of athletic training methods, students will explore personal fitness goal-setting and lifelong physical well-being.

Prerequisite: None

Healthy Living and Large-Group Activities - Basketball Development
Grade 12

PAL40S
Open

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Prerequisite: None (Proven basketball experience is an asset)

MATHEMATICS

Principles of Mathematics
Grade 10

MPM2D1
Academic

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relationships and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically as they solve multi-step problems and communicate their thinking.

Prerequisite: MTH1W1 or MTH1WA

Principles of Mathematics - Pre-Advanced Placement
Grade 10

MPM2DA
Academic

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relationships and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically as they solve multi-step problems and communicate their thinking.

Prerequisite: MTH1W1 or MTH1WA

Foundations of Mathematics
Grade 10

MFM2P1
Applied

This course enables students to consolidate their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and hands-on activities. Students will develop and graph equations in analytic geometry; solve and apply linear systems, using real-life examples; and explore and interpret graphs of quadratic relationships. Students will investigate similar triangles, the trigonometry of right-angled triangles, and the measurement of three-dimensional objects. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MTH1W1 or MTH1WA

Mathematics
Grade 10

MAT2L1
LDCC

This course emphasizes further development of mathematical knowledge and skills to prepare students for success in their everyday lives, in the workplace, and in the Grade 11 Mathematics Workplace course. The course is organized in three strands related to money sense, measurement, and proportional reasoning. In all strands, the focus is on developing and consolidating key foundational mathematical concepts and skills by solving authentic, everyday problems. Students have opportunities to further develop their mathematical literacy and problem-solving skills and to continue developing their skills in reading, writing, and oral language through relevant and practical math activities.

Prerequisite: MAT1L1 or MTH1W1 or MTH1WA

Functions
Grade 11

MCR3U1
University

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; and develop facility in simplifying polynomial and rational expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Prerequisite: MPM2D1 or MPM2DA

Functions - Pre-Advanced Placement
Grade 11

MCR3UA
University

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; and develop facility in simplifying polynomial and rational expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Prerequisite: MPM2D1 or MPM2DA

Functions and Applications

Grade 11

MCF3M1

University/College

This course introduces basic features of the function by extending students' experiences with quadratic relations. It focuses on quadratic, trigonometric, and exponential functions and their use in modelling real-world situations. Students will represent functions numerically, graphically, and algebraically; simplify expressions; solve equations; and solve problems relating to financial and trigonometric applications. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

Prerequisite: MFM2P1 or MPM2D1 or MPM2DA

Foundations for College Mathematics

Grade 11 - In class or eLearning

MBF3C1/E

College

This course enables students to broaden their understanding of mathematics as a problem-solving tool in the real world. Students will extend their understanding of quadratic relations, as well as of measurement and geometry; investigate situations involving exponential growth; solve problems involving compound interest; solve financial problems connected with vehicle ownership; and develop their ability to reason by collecting, analysing, and evaluating data involving one or two variables. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MFM2P1 or MPM2D1 or MPM2DA

Mathematics for Work and Everyday Life

Grade 11

MEL3E1

Workplace

This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will solve problems associated with earning money, paying taxes, and making purchases; apply calculations of simple and compound interest in saving, investing, and borrowing; and calculate the costs of transportation and travel in a variety of situations. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MAT2L1 or MFM2P1 or MPM2D1

Advanced Functions

Grade 12

MHF4U1

University

This course extends students' experiences with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students who plan to study mathematics in university and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.

Prerequisite: MCR3U1 or MCR3UA

Calculus and Vectors

Grade 12 - In class or eLearning

MCV4U1/E

University

This course builds on students' experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors, and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, rational, exponential, and sinusoidal functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who plan to study mathematics in university and who may choose to pursue careers in fields such as physics and engineering.

Prerequisite: MHF4U1 (can be taken concurrently with or can precede MCV4U1)

Concurrent 2 Credit offering for AP Mathematics Students Full Year

Advanced Functions / Calculus and Vectors

12MFCV

Please take a moment to read the course descriptions for the full curriculum overview and expectations. This 2 credit, consecutive offering of the senior math courses will allow students to begin the AP Calculus and Vectors immediately upon completion of the Advanced Functions. The course extends students' experience with Functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will refine their use of the mathematical processes necessary for success in senior Mathematics. This course is intended both for students taking the Calculus and Vectors courses as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.

This 2 credit, consecutive offering builds on students' previous experience with functions and their developing understanding of rates of change. Students will broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions, apply these concepts and skills to the modelling of real-world relationships; and extend their knowledge of calculus to the field of integration and related theorems. Students will refine their use of the mathematical processes necessary for success in senior Mathematics. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three-dimensional space. This combined 2 credit course is intended for students who choose to pursue careers in fields such as science, engineering, economics, and some areas of business, including those students who will be required to take a university-level calculus, linear algebra, or physics course.

Prerequisites: MCR3U1 or MCR3UA

Data Management

Grade 12

MDM4U1

University

This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing large amounts of information; solve problems involving probability and statistics; and carry out a culminating project that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest.

Prerequisite: MCF3M1 or MCR3U1 or MCR3UA

Foundations for College Mathematics

Grade 12

MAP4C1

College

This course enables students to broaden their understanding of real-world applications of mathematics. Students will analyze data using statistical methods; solve problems involving applications of geometry and trigonometry; solve financial problems connected with annuities, budgets, and renting or owning accommodation; simplify expressions; and solve equations. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for college programs in areas such as business, health sciences, and human services, and for certain skilled trades.

Prerequisite: MBF3C1 or MCF3M1 or MCR3UA or MCR3U1

Mathematics for Work and Everyday Life

Grade 12

MEL4E1

Workplace

This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will investigate questions involving the use of statistics; apply the concept of probability to solve problems involving familiar situations; investigate accommodation costs and create household budgets; use proportional reasoning; estimate and measure; and apply geometric concepts to create designs. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MEL3E1

SCIENCE

General Science

Science

Grade 10

SNC2D1

Academic

This course enables students to develop their understanding of basic concepts in biology, chemistry, earth and space science, and physics, and to relate science to technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid-base reactions; forces that affect climate and climate change; and the interaction of light and matter.

Prerequisite: SNC1W1

Science

Grade 10

SNC2P1

Applied

This course enables students to develop a deeper understanding of concepts in biology, chemistry, earth and space science, and physics, and to apply their knowledge of science in real world situations. Students are given opportunities to develop further practical skills in scientific investigation. Students will plan and conduct investigations into everyday problems and issues related to human cells and body systems; chemical reactions; factors affecting climate change; and the interaction of light and matter.

Prerequisite: SNC1W1

Biology

Biology

Grade 11 - In class or eLearning

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

Prerequisite: SNC2D1

SBI3U1/E

University

Biology

Grade 11

This course focuses on the processes involved in biological systems. Students will learn concepts and theories as they conduct investigations in the areas of cellular biology, microbiology, animal anatomy and physiology, plant structure and physiology, and environmental science. Emphasis will be placed on the practical application of concepts, and on the skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: SNC2D1 or 2P1

SBI3C1

College

Biology

Grade 12

This course provides students with the opportunity for indepth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of laboratory skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: SBI3U1

SBI4U1

University

Chemistry

Chemistry

Grade 11 - In class or eLearning

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment.

Prerequisite: SNC2D1

SCH3U1/E

University

Chemistry

Grade 12 - In class or eLearning

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment.

Prerequisite: SCH3U1

SCH4U1/E

University

Chemistry

Grade 12 - In class or eLearning

This course enables students to develop an understanding of chemistry through the study of matter and qualitative analysis, organic chemistry, electrochemistry, chemical calculations, and chemistry as it related to the quality of the environment. Students will use a variety of laboratory techniques, develop skills in data collection and scientific analysis, and communicate scientific information using appropriate terminology. Emphasis will be placed on the role of chemistry in daily life and the effects of technological applications and processes on society and the environment.

Prerequisite: SNC2D1 or 2P1

SCH4C1/E

College

Physics

Physics

Grade 11

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyse the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment.

Prerequisite: SNC2D1

SPH3U1

University

Physics

Grade 12 - eLearning

This course develops students' understanding of the basic concepts of physics. Students will explore these concepts with respect to motion; mechanical, electrical, electromagnetic, energy transformation, hydraulic, and pneumatic systems; the operation of commonly used tools and machines. They will develop their scientific investigation skills as they test laws of physics and solve both assigned problems and those emerging from their investigations. Students will also consider the impact of technological applications of physics on society and the environment.

Prerequisite: SNC2P1 or SNC2D1 or SNC2DA

SPH4CE

College

Physics

Grade 12 - In class or eLearning

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse qualitatively and quantitatively, data relating to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment.

Prerequisite: SPH3U1

SPH4U1/E

University

Environmental Science

Environmental Science

Grade 11

This course provides students with the fundamental knowledge of and skills relating to environmental science that will help them succeed in work and life after secondary school. Students will explore a range of topics, including the impact of human activities on the environment; human health and the environment; energy conservation; resource science and management; and safety and environmental responsibility in the workplace. Emphasis is placed on relevant, practical applications and current topics in environmental science, with attention to the refinement of students' literacy and mathematical literacy skills as well as the development of their scientific and environmental literacy.

Prerequisite: SNC1D1 or 1P1 or 1L1 or 2L1

SVN3E1

Workplace

SOCIAL SCIENCES AND HUMANITIES

Family Studies

Food and Nutrition

Food and Nutrition (*French Immersion*)

Grade 9 or 10

This course focuses on guidelines for making nutritious food choices. Students will investigate factors that influence food choices, including beliefs, attitudes, current trends, traditional eating patterns, food marketing strategies, and individual needs. Students will also explore the environmental impact of a variety of food choices at the local and global level. The course provides students with opportunities to develop food preparation skills and introduces them to the use of social science research methods in the area of food and nutrition.

Prerequisite: None

HFN201

HFN20F

Open

Food and Culture (French Immersion)
Grade 11

This course focuses on the flavours, aromas, cooking techniques, foods, and cultural traditions of world cuisines. Students will explore the origins of and developments in diverse food traditions. They will demonstrate the ability to cook with ingredients and equipment from a variety of cultures, compare food-related etiquette in many countries and cultures, and explain how Canadian food choices and traditions have been influenced by other cultures. Students will develop practical skills and apply social science research methods while investigating foods and food practices from around the world.

Prerequisite: None

HFC3MF
University/College

Food and Culture
Grade 11

This course focuses on the flavours, aromas, cooking techniques, foods, and cultural traditions of world cuisines. Students will demonstrate the ability to cook with ingredients and equipment from a range of cultures, describe food-related etiquette in a variety of countries and cultures, and explore ways in which Canadian food choices and traditions have been influenced by other cultures. Students will have opportunities to develop practical skills and apply research skills as they investigate foods and food practices from around the world.

Prerequisite: None

HFC3E1
Workplace

Raising Healthy Children
Grade 11 - In class or eLearning

This course focuses on the skills and knowledge parents, guardians, and caregivers need, with particular emphasis on maternal health, pregnancy, birth, and the early years of human development (birth to six years old). Through study and practical experience, students will learn how to meet the developmental needs of young children, communicate with them, and effectively guide their early behaviour. Students will develop their research skills through investigations related to care-giving and child rearing.

Prerequisite: None

HPC301/E
Open

Human Development Throughout the Lifespan
Grade 12 - eLearning

This course offers a multidisciplinary approach to the study of human development throughout the lifespan. Students will learn about a range of theoretical perspectives on human development. They will examine threats to healthy development as well as protective factors that promote resilience. Students will learn about physical, cognitive, and social-emotional development from the prenatal period through old age and will develop their research and inquiry skills by investigating issues related to human development.

Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies.

HHG4ME
University/College

Nutrition and Health
Grade 12

This course examines the relationships between food, energy balance, and nutritional status; the nutritional needs of individuals at different stages of life; and the role of nutrition in health and disease. Students will evaluate nutrition-related trends and will determine how food choices can promote food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and develop their social science research skills by investigating issues related to nutrition and health.

Prerequisite: Any university, university/college, or college preparation course in social sciences and humanities, English, or Canadian and world studies

HFA4U1
University

Nutrition and Health
Grade 12

This course focuses on the relationship between nutrition and health at different stages of life and on global issues related to food production. Students will investigate the role of nutrition in health and disease and assess strategies for promoting food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and refine their ability to use social science research and inquiry methods to investigate topics related to nutrition and health.

Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

HFA4C1
College

General Social Sciences

Intro to Anthropology, Sociology and Psychology

HSP3U1

Intro to Anthropology, Sociology and Psychology (French Immersion)

HSP3UF

Grade 11

University

This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science, and to become familiar with current thinking on a range of issues within the three disciplines.

Prerequisite: The Grade 10 academic course in English or the Grade 10 academic history course (Canadian and world studies).

Introduction to Anthropology, Sociology and Psychology

HSP3C1

Grade 11

College

This course introduces students to theories, questions, and issues related to anthropology, psychology, and sociology. Students learn about approaches and research methods used by social scientists. Students will be given opportunities to apply theories from a variety of perspectives, to conduct social science research, and to become familiar with current issues within the three disciplines.

Prerequisite: None

Challenge and Change in Society

HSB4U1/E

Grade 12 - In class or eLearning

University

This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyse how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyse causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change.

Prerequisite: Any university, university/college, or college preparation course in social sciences and humanities, English, or Canadian and world studies

TECHNOLOGICAL EDUCATION

Communications Technology

TGJ201

Grade 10

Open

This course introduces students to communications technology from a media perspective. Students will work in the areas of TV/video and movie production, radio and audio production, print, graphic communications, photography, and interactive new media and animation. Student projects may include computer-based activities such as creating videos, editing photos, working with audio, cartooning, developing animations, and designing web pages.

Prerequisite: None

Communications Technology

TGJ3ME

Grade 11 - eLearning

University/

College

This course examines communications technology from a media perspective. Students will develop knowledge and skills as they design and produce media projects in the areas of live, recorded, and graphic communications. These areas may include TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also develop an awareness of related environmental and societal issues, and will explore college and university programs and career opportunities in the various communications technology fields.

Prerequisite: None

Communications Technology: Print and Graphic

TGG3M1

Communication (Yearbook)

Grade 11

University/College

This course enables students to develop media knowledge and skills while designing and producing the school yearbook and other projects in the area of graphic design communications. Students will work both independently and as part of a team learning the basics of journalism, layout, and design, photography, publishing, marketing and advertising through the production of the school yearbook and newsletters. Classroom activities will be closely related to the real world on interviewing, reporting, photographing, meeting deadlines and producing both paper and online publications. Students will also develop an awareness of related environmental and societal issues and explore college and university programs and career opportunities in the various communications technology fields.

Prerequisite: None

Communications Technology: Print and Graphic Communication (Yearbook)
Grade 12
TGG4M1
University/College

This course enables students to develop media knowledge and skills while designing and producing the school yearbook and other projects in the area of graphic design communications. Students will work both independently and as part of a team gaining expertise in the areas of digital workflow, photo composition, journalism, layout design and publishing in both print and web-based environments. Practical projects may include yearbook cover design, layouts, photo journalism, web galleries, and portfolio development. Classroom activities continue to reflect the real world of interviewing, reporting, photographing, meeting deadlines, and producing publications. Students will also expand their awareness of environmental and social issues related to communications technology and will investigate career opportunities and challenges in a rapidly changing technological environment.

Prerequisite: TGG3M1

Construction Technology

Construction Technology
Grade 10
TCJ201
Open

This course introduces students to building materials and processes through opportunities to design and build various construction projects. Students will learn to create and read working drawings; become familiar with common construction materials, components, and processes; and perform a variety of fabrication, assembly, and finishing operations. They will use a variety of hand and power tools and apply knowledge of imperial and metric systems of measurement, as appropriate. Students will develop an awareness of environmental and societal issues related to construction technology, and will explore secondary and post secondary pathways leading to careers in the industry. Students will develop skills through projects such as canoe paddles, furniture, cabinets, structures, and others.

Prerequisite: None

Construction Engineering Technology
Grade 11
TCJ3C2 - 2 Credit Course
College

This course focuses on the development of knowledge and skills related to residential construction. Students will gain hands on experience using a variety of construction materials, processes, tools, and equipment; learn about building design and planning construction projects; create and interpret working drawings and sections; and learn how the Ontario Building Code and other regulations and standards apply to construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology, and explore career opportunities in the field.

Prerequisite: None

Students interested in being part of the Construction Specialist High Skills Major Program are required to choose the 2 credit version of the course.

Construction Technology
Grade 11
TCJ3E2 - 2 Credit Course
Workplace

This course enables students to develop technical knowledge and skills related to carpentry, masonry, electrical systems, heating and cooling, and plumbing for residential construction. Students will gain hands on experience using a variety of materials, processes, tools, and equipment to design, lay out, and build projects. They will create and read technical drawings, learn construction terminology, interpret building codes and regulations, and apply mathematical skills as they develop construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology, and explore post secondary and career opportunities in the field.

Prerequisite: None

Students interested in being part of the Construction Specialist High Skills Major Program are required to choose the 2 credit version of the course.

Custom Woodworking
Grade 11
TWJ3E1
Workplace

This course enables students to develop knowledge and skills related to cabinet making and furniture making. Students will gain practical experience using a variety of the materials, tools, equipment, and joinery techniques associated with custom woodworking. Students will learn to create and interpret technical drawings and will plan, design, and fabricate projects. They will also develop an awareness of environmental and societal issues related to the woodworking industry, and explore apprenticeships, post secondary training, and career opportunities in the field that may be pursued directly after graduation.

Prerequisite: None

Construction Engineering Technology
Grade 12
TCJ4C2 - 2 Credit Course
College

This course enables students to further develop knowledge and skills related to residential construction and to explore light commercial construction. Students will gain hands on experience using a variety of materials, processes, tools, and equipment and will learn more about building design and project planning. They will continue to create and interpret construction drawings and will extend their knowledge of construction terminology and of relevant building codes and regulations, as well as health and safety standards and practices. Students will also focus on environmental and societal issues related to construction engineering technology, and explore career opportunities in the field.

Prerequisite: TCJ3C1

Construction Technology
Grade 12
TCJ4E2 - 2 Credit Course
Workplace

This course enables students to further develop technical knowledge and skills related to residential construction and to explore light commercial construction. Students will continue to gain hands on experience using a variety of materials, processes, tools and equipment; create and interpret construction drawings; and learn more about building design and project planning. They will expand their knowledge of terminology, codes and regulations, and health and safety standards related to residential and light commercial construction. Students will also expand their awareness of environmental and societal issues related to construction technology and explore entrepreneurship and career opportunities in the industry that may be pursued directly after graduation.

Prerequisite: TCJ3E1

Custom Woodworking
Grade 12
TWJ4E1
Workplace

This course enables students to further develop knowledge and skills related to the planning, design, and construction of residential and/or commercial cabinets and furniture. Students will gain further experience in the safe use of common woodworking materials, tools, equipment, finishes, and hardware, and will learn about the entrepreneurial skills needed to establish and operate a custom woodworking business. Students will also expand their awareness of health and safety issues and environmental and societal issues related to woodworking, and will explore career opportunities that may be pursued directly after graduation.

Prerequisite: TWJ3E1

Hairstyling and Aesthetics

Hairstyling and Aesthetics
Grade 10
TXJ201
Open

This course presents hairstyling, make-up, and nail care techniques from a salon/spa perspective. Using materials, processes, and techniques used in the industry, students learn fundamental skills in hairstyling, giving manicures, and providing hair/scalp analyses and treatments. Students will also consider related environmental and societal issues, and will explore secondary and postsecondary pathways leading to careers in the field of hairstyling and aesthetics.

Prerequisite: None

Hairstyling and Aesthetics
Grade 11
TXJ3E1
Workplace

This course enables students to develop knowledge and skills in hairstyling and aesthetics and offers a variety of applications that will equip students to provide services for a diverse clientele. Students will identify trends in the hairstyling and aesthetics industry, learn about related health and safety laws, and expand their communication and interpersonal skills through interactions with peers and clients. Students will also consider environmental and societal issues related to the industry, and will acquire a more detailed knowledge of apprenticeships and direct-entry work positions.

Prerequisite: None

Hairstyling and Aesthetics
Grade 12
TXJ4E1
Workplace

This course enables students to develop increased proficiency in a wide range of hairstyling and aesthetics services. Students will strengthen their fundamental skills and develop an understanding of common business practices and strategies in the salon/spa industry. Students will also expand their understanding of environmental and societal issues and their knowledge of post secondary destinations in the hairstyling and aesthetics industry. Come experience the endless prospects that this course has to offer. The only place to find all this is exclusively at Hammarskjöld.

Prerequisite: TXJ3E1

Manufacturing Technology

Manufacturing Technology - Metal Working

Grade 10

TMJ201

Open

This course introduces students to the manufacturing industry by giving them an opportunity to design and fabricate products using a variety of processes, tools, and equipment. Students will learn about technical drawing, properties and preparation of materials, and manufacturing techniques. Student projects may include a robotic challenge, a design challenge, and fabrications project involving processes such as machining, welding, and sheet metal forming. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about secondary and post secondary pathways leading to careers in the industry. Hammarskjold's fully equipped Manufacturing Lab and Manufacturing courses will provide you with endless "project-driven" learning opportunities throughout high school.

Prerequisite: None

Manufacturing Technology - Metal Working

Grade 11

TMJ3C1

College

This course enables students to develop knowledge and skills through hands-on, project-based learning. Students will acquire design, fabrication, and problem solving skills while using tools and equipment such as lathes, mills, welders, computer-aided machines, robots, and control systems. Students may have opportunities to obtain industry-standard certification and training. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about pathways leading to careers in the industry.

Prerequisite: None

Manufacturing Technology - Metal Working

Grade 11

TMJ3E1

Workplace

This hands-on, project-based course is designed for students planning to enter an occupation or apprenticeship in manufacturing directly after graduation. Students will work on a variety of manufacturing projects, developing knowledge and skills in design, fabrication, and problem solving and using tools and equipment in Hammarskjold's fully equipped Manufacturing Lab. In addition, students may have the opportunity to acquire industry-standard certification and training. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about secondary school pathways that lead to careers in the industry.

Prerequisite: None

Manufacturing Technology - Metal Working

Grade 12

TMJ4C1

College

This course enables students to further develop knowledge and skills related to machining, welding, print reading, and computer numerical control (CNC). Students will develop proficiency in using mechanical, pneumatic, electronic, and computer control systems in a project-based learning environment and may have opportunities to obtain industry-standard training and certification. Students will expand their awareness of environmental and societal issues and career opportunities in the manufacturing industry.

Prerequisite: TMJ3C1

Manufacturing Technology - Metal Working

Grade 12

TMJ4E1

Workplace

This project-driven, hands-on course builds on students' experiences in manufacturing technology. Students will further develop knowledge and skills related to the use of engine lathes, milling machines, welding machines, and other related tools and equipment as they design and fabricate solutions to a variety of technological challenges in manufacturing. Students may have opportunities to acquire industry-standard training and certification. Students will expand their awareness of environmental and societal issues and of career opportunities in the manufacturing industry.

Prerequisite: TMJ3E1

Transportation Technology

Transportation Technology

Grade 10

TTJ201

Open

This course introduces students to the service and maintenance of vehicles. Students will develop knowledge and skills related to the construction and operation of vehicle/craft systems and learn maintenance and repair techniques. Student projects may include the construction of a self-propelled vehicle or craft, engine service, tire/wheel service, electrical/battery service, and proper body care. Students will develop an awareness of related environmental and societal issues, and will explore secondary and postsecondary pathways leading to careers in the transportation industry.

Prerequisite: None

Transportation Technology: Auto Service

Grade 11

TTA3C1

College

This course enables students to develop technical knowledge and skills as they study, test, service, and repair engine, electrical, suspension, brake, and steering systems on vehicles. Students will develop communication and teamwork skills through practical tasks, using a variety of tools and equipment. Students will develop an awareness of environmental and societal issues related to transportation and will learn about apprenticeship and college programs leading to careers in the transportation automotive industry.

Prerequisite: None

Transportation Technology: Auto Service

Grade 11

TTA3C2

College

2 Credit

This course enables students to develop technical knowledge and skills as they study, test, service, and repair engine, electrical, suspension, brake, and steering systems on vehicles. Students will develop communication and teamwork skills through practical tasks, using a variety of tools and equipment. Students will develop an awareness of environmental and societal issues related to transportation and will learn about apprenticeship and college programs leading to careers in the transportation automotive industry.

Prerequisite: None

Transportation Technology: Auto Service

Grade 12

TTA4C1

College

This course enables students to further develop technical knowledge and skills as they study, test, service, and repair engine management systems; power trains; steering/control, suspension; brake, and body systems on vehicles; and/or small engine products. Students will refine communication and teamwork skills through practical tasks, using a variety of tools and equipment. Students will expand their awareness of environmental and societal issues related to transportation and their knowledge of apprenticeship and college programs leading to careers in the transportation industry.

Prerequisite: TTA3C1

Dual Credits

Secondary Credit + College Credit

Dual credits are defined as a high school credit and a college credit earned at the same time. The opportunity to earn two credits simultaneously is available to senior students in programs that vary each year.

College Link (Alternative Program)

The College Link program will bring students into the college environment while completing their high school course requirements. College Link emphasizes communication, literacy, and planning for the future.

Students will be enrolled in the dual credit course General Education Elective while working on high school credits through an independent learning model. Once a student has achieved that dual credit successfully they are then allowed to take up to three (3) college delivered dual credit top up courses.

College Link courses are subject to change, please see Student Services for a current list of course options.

Monday-Friday | 9:30 am 3:30 pm

Please see Administration/Vice Principal about admission requirements or to be enrolled in the College Link Program.

Team Taught Dual Credits

These programs are team taught by College and Secondary School Staff. Students are able to obtain both a Secondary Credit and a College Credit simultaneously. These dual credit opportunities are available at the designated school.

Aviation Link

TTL4C Transportation Technology: Light Aircraft (Grade 12) & TP166 Aviation Studies 1 (College)

Students will be introduced to a variety of basic skills related to the aviation industry. Students will have the opportunity to use aircraft simulators, classroom time, and practicum in an actual aircraft maintenance hangar. This course is recommended for students who are considering flight management, aviation technician, or aerospace manufacturing engineering technician / technology as a future program. Through a combination of theory and practical experience, students will gain the background necessary to proceed with further study in a more advanced program.

Superior | Hammarskjold | Westgate

Manufacturing Link

TMJ4E Manufacturing Technology (Grade 12) or TMW4E (Welding) & WC 126 Flat T-Joint Module (College) & TMJ4E/4C

In this course the students will identify the different welding procedures for T-Joints in flat, horizontal, vertical and overhead positions. Welding exercises are demonstrated using 6010-11 and 7018 electrodes in these positions and specific safety precautions for overhead welding are addressed.

Superior | Westgate

Transportation Link

TTA4C Transportation Technology (Grade 12) & HC 121 Applied Work Practices and Procedures (College)

This course introduces students to occupational health and safety, basic hand and power tools, precision measuring tools, fastening devices and torquing procedures. Heating and cutting methods are introduced.

Westgate

Please check with Student Services for the current selection of dual-credit courses!

College Now!

<http://www.confederationcollege.ca/collegenow>

Change Your Life Through Learning

The College Now program is provided in partnership with the School College Work Initiative (SCWI), the Thunder Bay Catholic District School Board, and Lakehead Public Schools. Students can take "College Now" courses with an opportunity to earn credits that count toward both a secondary school and college diploma or certificate. Dual Credits let students "experience" college courses while still in high school.

Students must be:

- 17 or 18 years old in the graduating year;
- working towards an Ontario Secondary School Diploma;
- registered in a minimum of one high school credit in their home school; and
- approved by the school Principal.

In first semester, students have the opportunity to enroll in program specific college classes as a dual credit student (top-up credit in an actual college class with college students) as well as General Education Electives that are congregated (only high school students).

In second semester, students have the opportunity to enroll in General Education Electives and program specific classes that are all offered as congregated classes (only high school students).

Please check with Student Services to confirm which courses are available each semester.

SENIOR SPECIALIST FOCUS LEARNING

Cooperative Education

Cooperative Education is a unique program for students, integrating academic and technical study with practical experience in business and industry.

This learning experience helps students make informed decisions about future careers. Students also develop the work habits, attitudes and job skills necessary for a successful transition from secondary school to the workplace or post-secondary education. Cooperative Education students are typically in the senior grades, have a variety of post-secondary destinations: apprenticeship, college, university, work, and may be studying in any subject area.

Cooperative education opportunities are available in all Lakehead Public High Schools.

Ontario Youth Apprenticeship Program (OYAP)

All senior students can explore the career potential of the skilled trades with OYAP as their start point. Over 140 skilled trades offer an opportunity to learn, work and enjoy occupations with career flexibility and portability, professional licensing, a wide range of further training opportunities, small business ownership and a diversified and valued skill set.

Students can begin to accumulate credit towards an apprenticeship in their chosen skilled trade while they complete the requirements of their high school education. Students who are interested in participating in OYAP will need to choose cooperative education in their Grade 11 and/or Grade 12 year. To participate, students must have completed 16 credits and be at least 16 years of age.

An Ontario Youth Apprenticeship Program (OYAP) student is a student who is earning cooperative education credits for work experience in an apprenticeship occupation. The student may or may not be formally registered as an apprentice while attending secondary school.

Focused Apprenticeship Skills Training (OYAP-FAST)

If you are interested in learning more about the skilled trades through cooperative education, OYAP-FAST is an accelerated stream within OYAP that will allow students in Grades 11 and 12 to participate in more apprenticeship learning through additional co-operative education credits while completing their OSSD.

To participate in OYAP-FAST, students must:

- Meet the OYAP eligibility requirements -15 years or older, have completed 14 credits toward OSSD
- Have signed parent/guardian consent to participate in OYAP-FAST

Completion requirements for OYAP-FAST include that a student has:

- Earned 8 to 11 cooperative education credits with their placement component in the skilled trades.
- Registered as an apprentice (obtained a Registered Training Agreement (RTA)) by the time they complete their eighth cooperative education credit.

Students who meet the above completion requirements and all other OSSD requirements will be awarded the OYAP-FAST seal on their OSSD.

Creating Opportunities Through Cooperative Education: First Cooperative Education Experience Focused Apprenticeship Skills Training (OYAP-FAST) - Open	2 Credits	COP3F2
Creating Opportunities Through Cooperative Education: First Cooperative Education Experience Focused Apprenticeship Skills Training (OYAP-FAST) - Open	4 Credits	COP3F4
Creating Opportunities Through Cooperative Education: Second Cooperative Education Experience Focused Apprenticeship Skills Training (OYAP-FAST) - Open	2 Credits	COP4F2
Creating Opportunities Through Cooperative Education: Second Cooperative Education Experience Focused Apprenticeship Skills Training (OYAP-FAST) - Open	4 Credits	COP4F4

Cooperative Education Programs

Canadian Armed Forces

Army Reserve

COP4XA

Semester 2

The Army Reserve Co-op Program includes basic military training as an introduction to life in the Canadian Forces, specific to the Army Reserve. This means training to be a member of one of the Army Reserve units in Thunder Bay, at the Armoury on Park Avenue. The Army Reserve units in Thunder Bay are: 736 Communications Squadron, which specializes in electronic communications; the Lake Superior Scottish Regiment, which is an infantry unit; 18 Service Battalion, which specializes in transport, supply/logistics and technical repair and maintenance; and 18 Field Ambulance, which specializes in health care and trauma support services.

To be eligible, students must meet the following conditions:

- 16 years old prior to the starting date of the program;
- A Canadian citizen;
- Have a minimum of 15 credits prior to the start of the program;
- Enrolled in Semester 2 Co-op (afternoon);
- Successfully complete the entrance requirements prior to December 1 of the school year (physical, medical, aptitude);
- Able to attend program from 1:00 p.m. - 5:30 p.m., Monday through Friday and the occasional weekend training sessions, as well as the March Break.

Naval Reserve

COP4XN

Summer Program (See Student Services)

The Naval Reserve Co-op Program includes introductory training to life in the Canadian Forces, specifically the Canadian Naval Reserve. This means training to be part of the crew of a Canadian Navy Ship, a member of a Port Security Unit, a Port Inspection Diving Team or a Naval Intelligence Team. Students will work out of HMCS Griffon, Thunder Bay's Naval Reserve Unit located on Algoma Street.

To be eligible students must meet the following conditions.

- 16 years old prior to the start date of the program;
- A Canadian citizen;
- Have a minimum of 15 credits prior to start date;
- Successfully complete the entrance requirements prior to the start (physical, medical, aptitude);
- Be able to attend program

Aviation Technology

COP4XV (4 credits) (TTL3C2/4C2, TTL3CC,/4CC)

Aviation Technology is a program that is taught at the Confederation College A.C.E. Centre located at the Thunder Bay International Airport.

Grade 11 Semester 1 | Grade 12 Semester 2

Students will study aerodynamics, aircraft components, aircraft hardware and materials, inspection procedures and methods, ground marshalling and handling of aircraft, aircraft engines, and flight related subjects. Aviation Technology may include a cooperative education component incorporating practical experience within the aviation industry at the airport. This partnership between Lakehead Public Schools and Confederation College will give students regular exposure to the College's A.C.E. Aviation facility. Included in the program are field trips to related industries such as air traffic control, Bombardier and the Ministry of Natural Resources (CL415 Water Bombers.) All mathematics and physics requirements will be taught in the program.

Specialist High Skills Majors

Specialist High Skills Majors were developed to give students the opportunity to focus on a specific area of study.

Credit bundles are made up of sector-specific courses. Students acquire skills and knowledge in a hands-on, career-related learning environment with others who have the same goals and career expectations.

- Major credits
- Cooperative education credits (sector-specific)
- Plus additional credits with a focus in the stated discipline

Application and scheduling information is available from your Student Services Guidance Counsellor. Stop in for more information about the focus courses and specialized training students can receive with their SHSM participation.

Arts & Culture | Westgate

For students who are interested in a career in the Arts and Culture sector (music, dance, drama, graphics, design, communication technology, visual art, theatre arts, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. Students will be required to declare a Major area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Aviation & Aerospace | Westgate

For students who are interested in a career in the Aviation and Aerospace sector (aircraft maintenance, aircraft inspection, instrumentation, electrical or avionics mechanics, piloting, air traffic control, flight engineering, mechanical engineering, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Business | Westgate

For students who are interested in a career in the Business sector (trade and commerce, finance and insurance, accounting, real estate, marketing, information technology, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Construction | Hammarskjold, *Westgate (*Subject to Ministry approval)

For students who are interested in a career in the Construction sector (carpentry, architecture, construction management, electrical, home renovations, plumbing, structural engineering, home inspection, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Environment | Superior

For students who are interested in a career in the Environmental Sciences. Students will develop the knowledge and skills required for work in this field whether they pursue an apprenticeship, college, university, or

workplace pathway. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences. The Environmental industry presents a wide range of high-demand and flexible career options including Arborists; Conservation or Fishery Officers; Environmental Engineers, Biologists, and Planners; and Hunting and Fishing Guides.
